

LEUPOLD

2024 PRODUCT CATALOG

BE RELENTLESS

We're 700 American craftsmen making innovative, battle-proven optics for the world's most relentless hunters and shooters. We design, build, and test our products with a single-minded focus: to make sure they'll perform forever.

No matter where you take us, on the battlefield, in competition, or on the hunt, we won't let you down. So be bold. Be tenacious. Be relentless.

WE GUARANTEE A LIFETIME OF PERFORMANCE

A warranty that replaces broken optics doesn't do you any good when you're eight miles deep into the backcountry. That's why Leupold products are guaranteed to perform in the harshest conditions, shot after shot, year after year.

Leupold's Lifetime Guarantee

If your Leupold riflescope, red dot sight, binocular, or spotting scope doesn't perform, we will repair or replace it for free - whether you're the original owner or not. You don't need proof of ownership or a warranty card, and there's no time limit. We do this because we believe in superior quality and craftsmanship, and we're confident your Leupold won't let you down.

Leupold Electronics Limited Two-Year Warranty

Leupold electronic products, which include rangefinders, thermal products, and other electronic devices, are warrantied against defects in materials and workmanship for two-years from the date of purchase. If the product is found to be defective, Leupold & Stevens Inc. will repair or replace it free of charge, within that two-year period. Proof of purchase may be required to verify warranty.

Leupold Military and Tactical Products

Certain customer contracts for Military and Law Enforcement entities may specify a product warranty that supersedes the above consumer warranty.

International customers may be affected by embargoes and other trade restrictions. Please contact us if you are an international warranty customer prior to sending your scope to us for repair.

For questions or service

Please call 1-800-LEUPOLD or (503) 526-1400.

Warranty Exclusions

These warranties do not apply if the product has been modified, misused or has been damaged by accident, abuse, or misapplication. To ensure this doesn't happen to you, contact Leupold Product Service before having any work or repairs done to your Leupold optics. Call 1-800-LEUPOLD or (503) 526-1400.

Warranty Products which are unclaimed after a period of one year may be subject to forfeiture.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

RELENTLESS INNOVATION

Always innovating. Relentless performance requires constantly pushing ourselves and our products to their limits. Finding out what works, what doesn't, and what you need to be successful in the field. Leupold was born from the idea that we can do it better than anyone else, which still holds true today. Our elite team of almost 100 engineers share one goal—build products that are guaranteed to perform for life.

Custom Dial System® (CDS®)

CDS simplifies longer shots by eliminating the need for holdovers or ballistic calculations, using a custom dial specific to your rifle and ammo.

Fast-Focus Eyepiece

Our fast-focus eyepiece quickly brings your reticle into focus with minimal adjustments. Twist the eyepiece until you get a crisp view of your reticle and then you're good to go.

Guard-ion™ Hydrophobic Lens Coating

Acts as a guardian for your lenses, keeping them clean and clear with our proprietary coating that sheds water, dirt, oils, and more.

Scratch-Resistant Lenses

Provides added lens durability that far exceeds industry standards.

Motion Sensor Technology (MST™)

Always be ready to go with motion activated reticle illumination. It extends battery life by shutting off illuminated reticles after five minutes of inactivity and instantly turns on when moved.

True Ballistic Range/Wind (TBR®/W)

Leupold rangefinders with TBR/W technology take into account the angles of your shots and your rifle's ballistics to calculate deadly accurate shoot-to distances out to 800 yards. Other rangefinders can't deliver accurate ranges because they only use trigonometry to generate straight-line horizontal distances (Rifleman's Rule). Additionally, TBR/W provides a 10-mph wind-hold value (90° angle). When combined with a Leupold CDS scope and a reticle with wind-hold capability, TBR/W allows you to quickly get on target at any distance and in any wind condition.

Archer's Advantage™ Software

Select Leupold RX rangefinders now offer custom ballistic solutions using Archer's Advantage™ software. Using your arrow weight, arrow velocity, and peep height, Archer's Advantage™ software calculates extremely accurate ballistic solutions for high-angle short-distance shots, and medium-angle long-distance shots.

Flightpath™ Technology

Leupold RX rangefinders with Flightpath technology make it easy to determine if your arrow will clear obstructions between you and the target out to a typical distance of 85 yards. An illuminated mark in the display indicates your arrow's trajectory, so you can take tight shots with total confidence.

Trophy Scale™

Take the guess work out of accurately measuring the width or height of an animal's antlers with our proprietary software found in select RX Rangefinders.

Leupold Control App

Leupold's Bluetooth-enabled rangefinders seamlessly link with the Leupold Control app, allowing you to easily adjust settings, choose personalized display options, and accurately range targets with just a few quick taps on your mobile device.

COMPLETE SHOOTING SYSTEM

From locating animals at any distance, all the way to recovering downed game, we've got you covered.

- 1 SPOT**
Binocular
A wide range of magnification options and performance features help you tackle any environment on any budget.
- 2 IDENTIFY**
Spotting Scope
Rugged, high-magnification optics ensure you know exactly what you're going after in any terrain.
- 3 RANGE**
Rangefinder
Lightning-fast ranging engines combined with advanced ballistic calculations deliver the industry's most accurate distances.
- 4 DIAL**
CDS
Our game-changing Custom Dial System eliminates the need for holdovers, making longer-range shots easier than ever.
- 5 SHOOT**
Scope
Our rugged and reliable riflescopes are waterproof, fogproof, and guaranteed to perform for life.

LEUPOLD OPTICAL SYSTEMS

DELIVERING INDUSTRY-LEADING BRIGHTNESS AND CLARITY

Each Leupold Optical System builds off of the previous one to ensure every Leupold product has the clearest, brightest image in its class.

The Advanced Optical System withstands the test of time and outperforms most optics on the market, while the Elite Optical System delivers even more performance for those diehard hunters and shooters who demand as much from their optics as they do from themselves. The Professional-Grade Optical System delivers unmatched performance for professional guides and shooters who require the brightest, clearest optics on the market, no matter the conditions.

WHICH OPTICAL SYSTEM IS RIGHT FOR YOU?	
PROFESSIONAL-GRADE OPTICAL SYSTEM	Leupold's Professional-Grade Optical System offers unmatched light transmission that's designed to outperform in the most challenging conditions, industry-leading glare reduction for a clear image in harsh, direct light, and the resolution and clarity that professional guides and shooters demand.
ELITE OPTICAL SYSTEM	Leupold's Elite Optical System offers excellent dawn-to-dusk light transmission for a bright image when it matters most, elite-level glare reduction in harsh light, and the resolution and clarity diehard hunters and shooters demand.
ADVANCED OPTICAL SYSTEM	Leupold's Advanced Optical System offers tried and true light transmission for extended glassing sessions, best in class glare reduction in harsh light, and the resolution and clarity recreational sportsmen and sportswomen demand.

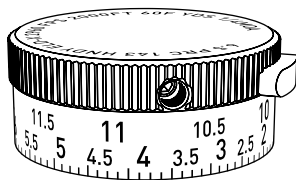

CUSTOM DIAL SYSTEM (CDS)

Using your ballistics, Leupold can create a custom dial to simplify your long-range shots.

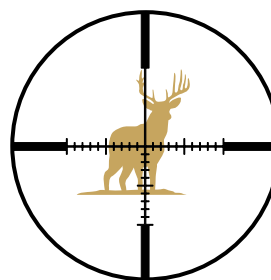

RANGE IT

If the object is
400 yards away

DIAL IT

Turn the dial to 4

AIM DEAD ON

No more worrying
about holdovers

BALLISTIC INFO REQUIRED

Caliber	Average temperature (dial is accurate +/- 20 degrees)
Bullet type	
Bullet weight	Sight height (center of scope to center of barrel)
Muzzle velocity	
Average elevation (dial is accurate +/- 2000 ft)	Zero distance (usually 100 or 200 yards)
Serial number of scope	Ballistic coefficient

To learn more about the Custom Dial System visit:
leupold.com/custom-dial-system

ORDER YOUR DIAL TODAY

Order online at www.leupold.com/freecds.

All CDS-equipped scopes qualify for one FREE DIAL;
additional dials are \$100.00 each.

THE LEUPOLD PUNISHER PROCESS

Our rigorous testing process goes above and beyond to make sure every scope holds up to a lifetime of abuse.

WATERPROOFING AND FOGPROOFING

From torrential downpours to crossing rivers, you'll never have to worry about a Leupold scope leaking or fogging up. Our proprietary waterproofing process includes submersion testing to a maximum depth of 66 feet and a multitude of pressure changes.

IMPACT TESTED AND VERIFIED

We built a machine to replicate one of the most extreme impact signatures imaginable: an ultra-lightweight .375 H&H Ackley Improved. With an incredibly sharp recoil impulse and a force about three times that of a .308, our impact tester—nicknamed the Punisher—inflicts at least 5,000 bone-jarring impacts on every scope design we make. Whether you buy a VX-Freedom or a Mark 5HD, you can go into the field knowing the design has already survived this extreme testing process while retaining functionality and holding a perfect zero.

EXTREME CLIMATE EXPOSURE

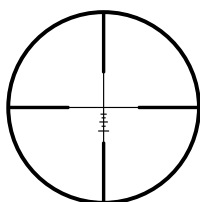

We make sure our optics perform at the highest level in the harshest conditions by testing them in extreme temperatures ranging from -20 degrees Fahrenheit to a blistering 140 degrees Fahrenheit.

HUNTING DIAL GUIDE

Why doesn't every riflescope use the same dial? Because you need the right tool for the job.

CDS® Dial

Low-profile, click adjustments. Can be laser engraved with your custom load info and range markings. No cover to lose. Your first CDS dial is engraved for free, when you purchase any CDS-ready riflescope.

CDS-T Dial

Large target dial provides access to the entire adjustment range of your scope. CDS-T comes capped and features an easy-to-read rotation indicator. Can be laser engraved with your custom load information.

CDS ZeroLock® Dial

Low-profile, one revolution, CDS-ready dials. The ZeroLock (ZL) ensures your dial only moves when you want it to. Push the button to unlock it and dial, then simply rotate it back to zero to lock it back in place. Can be laser engraved with your custom load information.

CDS-TZL3 Dial

Large, three revolution target dial designed for precision adjustments. CDS-TZL3 dial features a re-settable ZeroLock and an easy-to-read rotation indicator so you know how far you've dialed.

CDS-ZL2 Dial

Low-profile, two revolution, CDS-ready dials. The ZL2 release button protrudes on the first revolution and is flush on the second. Can be laser engraved with your load info and range markings.

Micro-Friction Adjustments

Marked in easy-to-read increments. Low-profile, covered dials. Set it and forget it.

Coin Click Adjustments

Easily adjusted with a coin, turret cap, or tool. Low-profile, covered dials. Fast, precise sight-in. Reset ring and index mark makes returning to zero simple.

Pop Up Rezero Dial

Easily align the zero on the dial to the index mark on the housing by popping up, spinning, and snapping down the dial.

Finger Click Adjustments With Resettable Zero Indicator

Low-profile covered dials. Fast, precise sight-in without coins or tools.

VX®-6HD

Any hunt, anywhere, anytime, your VX®-6HD is ready for anything. The VX-6HD's edge-to-edge clarity gives you outstanding brightness, color consistency, and resolution to dominate the first and last 15 minutes of the day. The wide zoom range and our performance-enhancing technology, which includes an in-scope electronic reticle level, a CDS-ZL2 or CDS-TZL3 elevation dial, and a removable throw lever, make your VX-6HD the most versatile Leupold riflescope ever made.

KEY BENEFITS

Leupold's Professional-Grade Optical System delivers the light transmission, glare reduction, and resolution professional guides and shooters demand

Eliminates accidental dial movement with the push-button ZeroLock® system

Simplifies mounting and improves long-range accuracy with the electronic leveling system

Sheds dirt and water for clear, crisp images with Guard-ion lens coating

Creates a visible aiming point in low-light conditions with illuminated reticles

Extends battery life with Motion Sensor Technology (MST™)

Quickly brings the reticle into focus with the fast-focus eyepiece

Allows for quick magnification changes with reversible throw lever

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

VX[®]-5HD

There are places where you can only take the essentials; the VX[®]-5HD has everything you need and nothing you don't. With high-definition lenses and extended low-light hunting performance, you can make the most of every second. When it's time to pull the trigger, you'll want the accuracy and additional elevation the two-turn CDS[®] ZeroLock[®] 2 dial delivers. As the lightest, most rugged 5:1 riflescope in its class, your VX-5HD will never slow you down.

KEY BENEFITS

Leupold's Professional-Grade Optical System delivers the light transmission, glare reduction, and resolution professional guides and shooters demand

Eliminates accidental dial movement with the push-button ZeroLock system

Creates more adjustment travel for longer shots with available 30mm and 34mm maintubes

Acquires far-off targets on high power and fast-moving targets on low power using a versatile magnification range

Sheds dirt and water for clear, crisp images with Guard-ion lens coating

Creates a visible aiming point in low-light conditions with available illuminated reticles

Extends battery life with Motion Sensor Technology (MST™)

Quickly brings the reticle into focus with the fast-focus eyepiece

Superior ruggedness is verified through Leupold's Punisher testing process

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

VX[®]-3HD

The VX[®]-3HD delivers what hunters want most in a riflescope: outstanding performance in low light in an incredibly tough yet lightweight package. With Leupold's Elite Optical System, the VX-3HD delivers excellent dawn-to-dusk light transmission for a bright image when it matters most, elite-level glare reduction in harsh light, and the resolution and clarity diehard hunters and shooters demand. We also gave it match-grade repeatability and ergonomic controls that are easy to read and use, even with gloves. Models with illuminated reticles make the VX-3HD the best lightweight, low-light hunting scope in its class. And with its low-profile, one-revolution CDS[®] ZeroLock[®] dial, you can be confident your dial will only move when you want it to. Push the button to unlock it, dial, and then rotate it back to zero to lock it in place. It's that simple. Everything we put into your VX-3HD is there to help you tag out.

KEY BENEFITS

Leupold's Elite Optical System delivers the light transmission, glare reduction, and resolution diehard hunters and shooters demand

Eliminates the need for holdovers on longer shots with the Custom Dial System[®]

FireDot[®] illumination creates a visible aiming point in low-light conditions

Prevents accidental adjustments and ensures an accurate return to zero with a ZeroLock dial

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Improves magnification changes with a removable throw lever

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

VX®-FREEDOM®

The VX®-Freedom® delivers the legendary Leupold® performance and dependability hunters and shooters have demanded for decades. With the VX-Freedom you get best-in-class optics, unbeatable accuracy, and a wide variety of reticles. It's also everything you expect from a Leupold: designed, machined, and assembled in our Oregon factory, tested to the same ruggedness standards as our top-tier riflescopes, and guaranteed for a lifetime of performance.

KEY BENEFITS

Leupold's Advanced Optical System delivers the light transmission, glare reduction, and resolution all recreational sportsmen and sportswomen demand

Eliminates holdovers on longer shots with the optional Custom Dial System® (CDS®)

Quickly change magnifications using the easy-to-grip power selector

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Creates a visible aiming point in any light condition with FireDot® illumination

Increases adjustment for longer shots with a 30mm maintube

Extends battery life with Motion Sensor Technology (MST™)

Waterproof, fogproof, and guaranteed to perform for life

Leupold’s fixed power riflescope remains a favorite for good reason. Its enduring appeal lies in its simplicity, rugged performance, and unmatched accuracy. We’ve channeled almost a century’s worth of optical expertise into its design, ensuring it excels in all conditions. And, as you’d expect, it’s completely waterproof, fogproof, and backed by a lifetime guarantee of unwavering performance.

KEY BENEFITS

Leupold’s Advanced Optical System delivers the light transmission, glare reduction, and resolution all recreational sportsmen and sportswomen demand

Provides easy-to-use design with fixed magnification

Maintains reticle focus with lockable eyepiece

Superior ruggedness is verified through Leupold’s Punisher testing process

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Waterproof, fogproof, and guaranteed to perform for life

HANDGUN

With a Leupold® Handgun scope, you not only eliminate the need to focus on the front sight, but you totally eliminate the inaccuracy of a handgun's short sight radius. All that's left is you, the crosshairs, and the game. This scope can take a beating, too, adhering to the rigorous standards set for all Leupold scopes. And just like our other riflescopes, it's proudly crafted, machined, and assembled in the USA and comes with a lifetime guarantee.

KEY BENEFITS

Leupold's Advanced Optical System delivers the light transmission, glare reduction, and resolution all recreational sportsmen and sportswomen demand

Simplifies mounting and improves target acquisition with Extended Eye Relief (EER)

Maintains reticle focus with lockable eyepiece

Superior ruggedness is verified through Leupold's Punisher testing process

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Waterproof, fogproof, and guaranteed to perform for life

ADJUSTMENT DIAL GUIDE

Why doesn't every riflescope use the same dial? Because you need the right tool for the job.

MIC3 ZeroLock Dial

Easy-to-grip, three-revolution, large external target dial that provides accurate and repeatable adjustments. Features a re-settable zero stop and a rotation indicator so you know how far you've dialed. Available in 1/4-MOA.

CDS-ZL2 Dial

Low-profile, two revolution, CDS-ready dials. The ZL2 release button protrudes on the first revolution and is flush on the second. Can be laser engraved with your load info and range markings.

M5C3 ZeroLock Dial

Low-profile, 0.1 MIL per click dials provide 30 MIL of adjustment in three revolutions. Visual and tactile revolution indicators ensure you don't get lost in the travel. The ZeroLock feature prevents inadvertent adjustments and ensures accurate return to zero.

Pop Up Rezero Dial

Easily align the zero on the dial to the index mark on the housing by popping up, spinning, and snapping down the dial.

P5 Dial

Easy-to-grip dial with large numbers delivers precise elevation adjustments in 0.1-MIL increments.

1/4-MOA Capped Dial

Low-profile covered dials. Fast, precise sight-in without coins or tools. Allows access to the full range of your scope's elevation travel.

Finger Click Adjustments With Resettable Zero Indicator

Low-profile covered dials. Fast, precise sight-in without coins or tools.

PATROL 6HD™

With the Patrol 6HD, you can hit the field without worry. Its ultra-lightweight, low-profile design and 1-6 magnification range let you engage threats anywhere from tight corners to open fields. Whether your mission is to protect and serve or you're looking for an edge in competition, this battle-ready scope will help you put more rounds on target. It's waterproof, fogproof, and guaranteed to perform for life.

KEY BENEFITS

Leupold's Professional-Grade Optical System delivers the light transmission, glare reduction, and resolution professional guides and shooters demand

Eliminates accidental dial movement with the push-button ZeroLock® system

Simplifies mounting and improves long-range accuracy with the electronic leveling system

Sheds dirt and water for clear, crisp images with Guard-ion lens coating

Creates a visible aiming point in low-light conditions with illuminated reticles

Extends battery life with Motion Sensor Technology (MST™)

Quickly brings the reticle into focus with the fast-focus eyepiece

Allows for quick magnification changes with a removable throw lever

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

MARK 5HD™

Pick up a Mark 5HD™ and you'll feel the difference; it's up to 20 ounces lighter than other scopes in its class. Get behind one and you'll see the difference, from the superior edge-to-edge clarity and extreme low-light performance to the versatility of the PR2™ reticle. With three revolutions of elevation adjustment, the Mark 5HD was built to max out the performance of the latest long range rifles and ammunition. It's ergonomically designed with more tactile, audible click adjustments, larger numbers, and a high-speed throw lever, so you can put accurate rounds downrange faster. And like all Leupold riflescopes, it's designed, machined, and assembled in the USA and guaranteed for life.

KEY BENEFITS

Leupold's Professional-Grade Optical System delivers the light transmission, glare reduction, and resolution professional guides and shooters demand

Provides accurate holdovers throughout the magnification range with front focal plane reticles

Engages targets at any distance with a large 5x magnification range

Extends long-range shooting with a lightweight 35mm maintube

Delivers 120 MOA or 34.9 MIL of travel using a precise and repeatable 3-turn ZeroLock® dial

Creates a visible aiming point in low-light conditions with illuminated reticles

Improves magnification changes with a removeable throw lever

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

MARK 4HD™

Upgrade every gun in your safe with a rugged Mark 4HD riflescope. We took the legendary performance of our Mark 5HD and gave it a slimmer maintube that's been packed full of professional-grade features. Whether you're a dedicated enthusiast or a uniformed professional, the Mark 4HD's optical clarity and lightweight design will get the job done at the range or in the field. The Mark 4HD series features four magnification ranges, giving you an accurate and reliable option for close-quarter engagements, long-range dominance, and everything in between. They're available with a three-turn elevation dial for unmatched confidence at extreme distances, a precise ZeroLock windage adjustment that won't budge when knocked around, and a side focus that'll give you tack-sharp images down to 25 yards. And like all Leupold riflescopes, they're waterproof, fogproof, and backed by our lifetime guarantee.

KEY BENEFITS

Leupold's Professional-Grade Optical System delivers the light transmission, glare reduction, and resolution professional guides and shooters demand

Eliminates accidental dial movement with the push-button ZeroLock system

Creates more adjustment travel for longer shots with available 30mm and 34mm maintubes

Engages targets at any distance with a 4x magnification range

Creates a visible aiming point in low-light conditions with illuminated reticles

Improves magnification changes with a removeable throw lever

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

MARK 3HD™

Leupold® riflescopes deliver elite optical performance. But reaching this level of excellence doesn't happen overnight. We have a long history of manufacturing military-grade optics that outperform and outlast everything else on the market, and now we've applied that heritage to a new line of tactical scopes: The Mark 3HD™. With a variety of models to choose from, you'll be sure to find a Mark 3HD rifle scope for nearly every tactical application. Complete with MIL-based adjustments, HD lenses, exposed elevation adjustment dial, and a low-profile power selector ring, this series delivers everything a tactical shooter could ask for. The illuminated FireDot® reticle with seven settings gets you on target fast, even in harsh daylight. And like all Leupold riflescopes, it's designed, machined, and assembled in the USA and guaranteed for life.

KEY BENEFITS

Leupold's Elite Optical System delivers the light transmission, glare reduction, and resolution diehard hunters and shooters demand

Quickly change magnifications using the easy-to-grip power selector

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Creates a visible aiming point in any light condition with available FireDot illumination

Extends battery life with Motion Sensor Technology (MST™)

Increases adjustment for longer shots with a 30mm maintube

Waterproof, fogproof, and guaranteed to perform for life

DELTAPOINT® PRO

The DeltaPoint® Pro is proof that you don't have to compromise performance, even on a small sight. Whether it's topping your AR, shotgun, or pistol, the DeltaPoint Pro gives you the immense, crystal-clear field of view and bold aiming point you need in high-pressure situations. Crafted from aircraft-grade aluminum, this sight is made to handle abuse. The DP-Pro® Night Vision model has improved night vision capability to support modern white phosphor equipment. It features new night vision settings with micro-adjustments, and a sleek tactical finish.

KEY BENEFITS

See more in less light with Leupold's Professional-Grade Red Dot Optical System

Supports night vision devices

Compatible with modern white phosphor equipment*

Micro-adjustments fine-tune the red dot to match the sensitivity of your night vision equipment*

Adjust the brightness of your red dot to match external conditions

Improves battery access without removing the sight with top-side battery compartment

Extends battery life with Motion Sensor Technology (MST®)

Delivers quick, precise, and repeatable adjustments with 1 MOA click-adjustments

Improves target acquisition with its huge field of view

Eliminates distortion and color inconsistency with crystal-clear lenses

Stands up to the roughest conditions with DiamondCoat 2 scratch resistant lenses

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

** Night Vision model only*

DELTAPOINT MICRO™

The DeltaPoint Micro™ is a fully enclosed, low-profile red dot sight designed specifically for concealed carry and personal defense. Until now, there hasn't been a compact red dot sight suited for pistols with smaller frames and lower sight profiles, but the DeltaPoint Micro changes the game. Mounted directly to the rear sight dovetail, the DeltaPoint Micro sits at the same height as factory iron sights and aligns the red dot with the front sight, giving you faster target acquisition and improved accuracy. And with eight levels of illumination, you can easily adjust the brightness of your red dot to match current conditions. If you need a rugged and reliable red dot for a conceal carry pistol but don't want to deal with replacing factory sights or complicated mounting systems, then the DeltaPoint Micro is for you. Current models fit Glock® and Smith & Wesson® M&P® handguns only.

KEY BENEFITS

See more in less light with Leupold's Professional-Grade Red Dot Optical System

Compact design is ideal for conceal carry with smaller size handguns and lower sight profiles

Mounts quickly and easily to the factory rear sight dovetail for absolute co-witness, eliminating the need for aftermarket rear iron sights

Adjust the brightness of your red dot to match external conditions

Supports night vision devices*

Acts like a ghost ring sight if battery dies

Extends battery life with Motion Sensor Technology (MST™)

Constant runtime of 3.5 years when set to illumination level 4

Improves target acquisition with a red dot that aligns to the height of factory front iron sights

Eliminates distortion and color inconsistency with crystal-clear lenses

Provides complete protection from the elements with a fully enclosed sight housing

Stands up to the roughest conditions with DiamondCoat 2 scratch resistant lenses

Disperses recoil energy for unrivaled durability with ultra-lightweight aluminum construction

Superior ruggedness is verified through Leupold's Punisher testing process

Waterproof, fogproof, and guaranteed to perform for life

**Excludes white phosphor equipment*

RETICLE

FREEDOM RDS®

All red dots are not created equal. The Freedom RDS® changes the game when it comes to consistency and durability in a red dot sight. We took our 70+ years of optics knowledge and created a red dot that's built Leupold® tough, performs in extreme conditions, and won't break the bank. It's everything you need in a red dot and nothing you don't. And like all Leupold riflescopes and red dot sights, it's designed, machined, and assembled in the USA and guaranteed for life.

KEY BENEFITS

See more in less light with Leupold's Professional-Grade Red Dot Optical System

Delivers a clear and precise aiming point with 1 MOA dot

Extends battery life with Motion Sensor Technology (MST™)

Offers precise 1/4-MOA click adjustments

Installs easily with AR-height mount

Provides accurate mid-range engagements with pre-calibrated 223 Rem BDC dial

Superior ruggedness by Punisher testing and verification

Stands up to the roughest conditions with DiamondCoat 2 scratch resistant lenses

Disperses recoil energy for unrivaled durability with ultra-lightweight construction

Waterproof, fogproof, and guaranteed to perform for life

BX-4 RANGE HD® TBR/W

When speed is paramount, there's no substitute for a range-finding binocular. The BX-4 Range HD TBR/W 10x42mm fuses our DNA engine and ballistics software with the optical performance diehard hunters and shooters demand. Now you can spot and range targets without wasting valuable seconds switching between gear. Its high-contrast red OLED display delivers visible readouts in any light, and its edge-to-edge clarity makes glassing sessions easy on the eyes. When you're packing for your next match or hunt, cut the excess. Take the BX-4 Range HD TBR/W.

KEY BENEFITS

Leupold's Elite Optical System delivers the light transmission, glare reduction, and resolution diehard hunters and shooters demand

Offers the versatility of a right/left programmable power button

Delivers incredible ruggedness with a lightweight magnesium body

SX™-2 ALPINE® HD

Built for the harshest conditions, the Leupold® SX™-2 Alpine® HD is a must-have for all serious hunters or shooters. It's incredibly rugged and 100 percent waterproof and fogproof. It features an oversized eyepiece that allows for comfortable all-day glassing, and Leupold's Advanced Optical System, which delivers tried-and-true light transmission for extended glassing sessions, best-in-class glare reduction in harsh light, and the resolution and clarity recreational sportsmen and sportswomen demand. Whether you're spending the day at the range or heading out for your first big game hunt, the SX-2 Alpine HD should be in your kit.

KEY BENEFITS

Leupold's Advanced Optical System delivers the light transmission, glare reduction, and resolution that all recreational sportsmen and sportswomen demand

Delivers more comfortable viewing with an oversized eyepiece

Eliminates eye-strain and fatigue with generous eyebox

Provides incredibly sharp images with ultra-smooth focus

Increases comfort with a twist-up eyecup

Stands up to the roughest conditions with scratch-resistant lenses

Controls glare with integrated sun shade

Mounts easily with tripod adapter

Sheds dirt and water for clear, crisp images with Guard-ion lens coating

Superior ruggedness is tested for extreme climates

Waterproof, fogproof, and guaranteed to perform for life

GOLD RING®

Proven performance, outstanding image quality, wide field of view, best-in-class eye relief, and a compact size: Gold Ring HD spotting scopes have it all. Select models offer the Impact® grid reticle for calling accurate shot corrections, but every model has Leupold's Folded Light Path System. This system uses mirrors rather than a heavy prism to create a more streamlined design. It also handles abuse better than prism systems, making it ideal for hunters or shooters who put their optics through the paces.

KEY BENEFITS

Leupold's Professional-Grade Optical System

delivers the light transmission, glare reduction, and resolution professional guides and shooters demand

Offers powerful magnification in a compact design with folded light path technology

Maximizes durability and reduces weight with a magnesium body

Delivers incredibly sharp images with ultra-smooth focus

Offers comfortable viewing options thanks to an adjustable eyecup

Mounts easily with tripod adapter

Stands up to the roughest conditions with scratch-resistant lenses

Superior ruggedness is tested for extreme climates

Waterproof, fogproof, and guaranteed to perform for life

Designed, machined, and assembled in the USA

RX[®]-5000 TBR[®]/W

Elevate your hunt with the RX-5000 TBR/W rangefinder. This cutting-edge device seamlessly connects to the Leupold Control App, allowing you to adjust its settings, customize display options, and take accurate ranges, all with a few quick taps on your mobile phone. But the real selling point of the RX-5000 is its pinning feature. Thanks to its GPS technology and our Long Range mode, you can now easily drop pins on a variety of digital mapping systems from over three miles away.

KEY BENEFITS

Provides ballistically calculated ranges for uphill/downhill shooting, using True Ballistic Range/Wind (TBR/W) technology

Delivers fast accurate readings with the DNA ranging engine

Provides exceptionally bright and clear images with a high light transmission red OLED display

Accurately ranges in snow, rain, and fog using Last Target mode

Allows you to place digital waypoints on a variety of mapping systems

Makes ranging long distances easy using 8x magnification

Boasts 5,000-yard ranging distance on reflective objects and 3,100 yards on trees

Maximizes durability with a high-impact aluminum chassis

Stays secure in all conditions thanks to easy-grip rubber armor

Mounts easily with a 1/4-20 tripod adapter

Waterproof and extreme climate tested

RX[®]-2800 TBR[®]/W

Long-range shooting will test your limits with every shot, which is where the RX[®]-2800 TBR[®]/W Alpha IQ[®] digital rangefinder comes in. With +/- 1-yard accuracy out to 2,800 yards, 7x magnification, and an easy-to-read red OLED display, this lightning-fast rangefinder is guaranteed to stretch your skills. This Alpha IQ digital rangefinder makes ranging smaller targets quicker than ever before, while our True Ballistic Range[®] with Wind (TBR/W) technology takes into account the angle of your shot and your rifle's ballistics to put you dead-on every time. Go farther even faster with the RX-2800 TBR/W digital rangefinder.

KEY BENEFITS

Provides ballistically calculated ranges for uphill/downhill shooting, using True Ballistic Range/Wind (TBR/W) technology

BX-4 RANGE HD® TBR/W

When speed is paramount, there's no substitute for a range-finding binocular. The BX-4 Range HD TBR/W 10x42mm fuses our DNA engine and ballistics software with the optical performance diehard hunters and shooters demand. Now you can spot and range targets without wasting valuable seconds switching between gear. Its high-contrast red OLED display delivers visible readouts in any light, and its edge-to-edge clarity makes glassing sessions easy on the eyes. When you're packing for your next match or hunt, cut the excess. Take the BX-4 Range HD TBR/W.

KEY BENEFITS

Leupold's Elite Optical System delivers the light transmission, glare reduction, and resolution diehard hunters and shooters demand

Offers the versatility of a right/left programmable power button

Delivers incredible ruggedness with a lightweight magnesium body

Delivers crystal-clear images with precision focus adjustments

Provides ballistically calculated ranges for uphill/downhill shooting using True Ballistic Range/Wind (TBR/W) technology

Mounts easily with 1/4-20 threaded tripod adapter

Sheds dirt and water for clear, crisp images with Guard-ion lens coating

Superior ruggedness is tested for extreme climates

Boasts 2,600-yard ranging distance on reflective objects and 1,600 yards on trees

RX[®]-1400i TBR[®]/W

The RX[®]-1400i TBR[®]/W Gen 2 enters the market as the most feature-rich rangefinder in its class. With our proprietary DNA[®] laser engine and an exceptionally bright red display, this rangefinder will give you fast, accurate, and visible readings every time. Its True Ballistic Range/Wind technology delivers custom shoot-to distances based on your rifle cartridge, and its Flightpath feature indicates possible arrow obstructions when you're hunting with a bow. All this functionality comes wrapped up in an incredibly rugged, lightweight polymer housing, making the RX-1400i TBR/W the perfect choice for your next big adventure.

KEY BENEFITS

Provides ballistically calculated ranges for uphill/downhill shooting, using True Ballistic Range/Wind (TBR/W) technology

Provides incredibly fast ranging speeds using a high-performance DNA[®] (Digitally eNhanced Accuracy) laser engine

Provides exceptionally bright and clear images with a high light transmission red TOLED display

Calculates mid-range distances easily using 5x magnification, ideal for archery and rifle hunters

Accurately ranges in snow, rain, and fog using Last Target mode

Generates arrow drops out to 175 yards with bow-specific settings

Bow mode uses the ranged distance to calculate the ballistic equivalent to the target for more accurate uphill and downhill archery shots

Boasts 1,400-yard ranging distance on reflective objects and 1,200 yards on trees

Stays secure in all conditions thanks to easy-grip rubber armor

Waterproof and extreme climate tested

RX-FULLDRAW® 5

Your bow is custom-built to you, so your rangefinder should be, too. The RX-FullDraw® 5 combines the lightning-fast accuracy of Leupold's DNA® engine with the acclaimed Archer's Advantage™ software, making it the most ballistically advanced rangefinder on the market. Using your personal ballistics, shot distance, and angle compensation, the RX-FullDraw 5 calculates laser-accurate ranges based on your specific gear. Loaded with features designed for the modern archer, like Flightpath™ technology, it takes the guesswork out of achieving the perfect shot every time.

KEY BENEFITS

Flightpath technology determines if your arrow will clear obstructions between you and your target out to a typical distance of 85 yards

Archer's Advantage™ software uses your arrow weight, arrow velocity, and peep height to calculate extremely accurate ballistic solutions

Provides incredibly fast ranging speeds using a high-performance DNA® (Digitally eNhanced Accuracy) laser engine

Delivers exceptionally bright and clear images with high light transmission red OLED display

Accurately ranges in snow, rain, and fog using Last Target mode

Makes ranging long distances easy using 6x magnification

Boasts 1,200-yard ranging distance on reflective objects and 1,100 yards on trees

Stays secure in all conditions on account of an ergonomic housing with easy-grip rubber armor

Accommodates a larger variety of shooters with velocity inputs ranging from 170fps to 550fps

Waterproof and extreme climate tested

PACKOUT®

The Packout® is the go-to option for any hunter or shooter. ANSI Z87.1+ ballistic protection alongside our proven optical clarity make the Packout perfect for every adventure and everyday wear.

KEY BENEFITS

Daylight Max provides UV protection for optimal performance in bright conditions

ANSI Z87.1+ Ballistic Rating meets or exceeds ANSI high-velocity impact standards for eye protection

Diamondcoat Scratch Resistance reduces surface scratches with a hardened surface coating

No-slip Bridge provides all-day comfort with no-slip, soft-touch rubber bridge pads

Lifetime Guarantee protects against manufacturer's defects for the life of the product

In-Fused Polarized Lenses eliminate glare and keep your eyes fresh on the water and in the field

Guard-ion Hydrophobic Coating sheds dirt and water for a clear, crisp image

Rx Ready compatible with prescription lens requirements

CARBON FIBER TRIPODS

Leupold's Carbon Fiber Tripods deliver maximum versatility and performance to hunters and shooters alike, with a rugged, lightweight design that's ready to go anywhere. The Mark 5 is built to mount to a rifle, and is perfect for competition shooters and predator hunters. The Pro Guide is meant for long periods of glassing and is sturdy enough to shoot from while maintaining a compact, lightweight design. The ultra-lightweight Alpine is designed for backcountry hunters and offers a tough, minimalist solution that's easy to carry on the go.

KEY BENEFITS

Maximum versatility and performance with industry-standard Arca-Swiss quick release system

Superior ruggedness with complete carbon fiber and aluminum construction

Go anywhere, at any time thanks to ultra-lightweight design

Enhanced customization features through third-party accessory compatibility

Rapid, precise viewing adjustment using smooth ball-head action

Greater usability across consumer spectrum with increased maximum tripod height

4 STEP MOUNTING SYSTEM GUIDE

1

FIT BASE TO RIFLE

Determine which mounts will fit your rifle by using the chart.

Rifleman Mounts and DeltaPoint Pro Mounts are shown at the end of this section.

2

CHOOSE A MOUNT TYPE

Determine a mount type based on features. Example: STD (adjustable windage), Dual Dovetail, Quick Release, BackCountry, or Cross-slot.

3

MATCH RING HEIGHT TO OBJECTIVE DIAMETER

Determine the height of the rings required to mount your scope based on the front objective diameter of the scope, profile of the rifle barrel, and the type of rifle action. The goal is to have the objective of the scope as close as possible to the barrel without touching.

4

FIT RING DIAMETER TO MAINTUBE DIAMETER

Determine the ring diameter required to fit the scope maintube diameter. Example: you would need a set of 30mm rings to mount a scope with a 30mm maintube diameter.

1

CHOOSE A MOUNT TYPE

BACKCOUNTRY™

Lightweight 7075 aircraft-grade aluminum
Available in cross-slot and one-piece integrated styles

Standard to magnum calibers
Long-range MOA bases

CROSS-SLOT
