BLAZER

Handgun & Rimfire.....	27-30
------------------------	-------

Rimfire ammunition has been around since the dawn of metallic cartridges, but at CCI®, we've never let that stand in the way of innovation. We're always looking to the future and building new loads built for today's needs. This year is no different, and shooters will find new rounds that help them defend, control pests, and shoot quieter. It's all coming up in the following pages.

As always, thank you for shooting CCI.

EFFECTIVE EXPANSION

Now available in both 22 LR and new 22 WMR, Uppercut™ uses an exclusive jacketed hollow point to provide consistent, uniform expansion.

UPPERCUT NEW DEFENSE

Last year, CCI® changed the face of self-defense with the first CCI 22 LR round that provides the power, penetration and reliability needed for protection: Uppercut™. This year, we're building off that proven platform with a 22 WMR offering that gives defenders even more rimfire options. The new round features an unwaxed 40-grain jacketed hollow-point bullet with nose skiving that initiates full and reliable expansion through all platforms. It retains the weight needed to hit critical penetration depths, and CCI's legendary priming ensures it will always be ready when needed.

CRITICAL PENETRATION

Designed to retain weight on impact, Uppercut 22 LR achieves 8 to 10 inches of penetration in ballistics gel, with controlled expansion out of short-barrel semi-automatic pistols.

BALLISTICS

PART NUMBER	CARTRIDGE	BULLET STYLE	WT. (GRS.)	VELOCITY, FT/SEC			ENERGY, FT-LB			TRAJECTORY		TEST BARREL	
				MUZZLE	25 YDS	50 YDS	MUZZLE	25 YDS	50 YDS	MUZZLE	25YDS		50YDS
960CC*	22 LR	JHP	32	950	910	963	64	58	53	-1.5	⊕	-1.2	3"
NEW 22WMRUP	22 WMR	JHP	40	1050	1000	961	98	89	82	-1.5	⊕	-0.7	2"

* To ensure optimal performance, use in semi-automatic handguns with 2.5- to 4-inch barrels.

VARMINT

STINGER COPPER-PLATED HOLLOW POINT

Stinger 22 LR loads produce a muzzle velocity of 1,640 fps and are loaded within industry standard pressures. They shoot flat, anchor varmints fast and provide reliable performance thanks to CCI® priming and brass.

22PLINKSTER'S FAVORITE

CCI Stinger isn't just a great load for pinning down varmints. It's also one of the top choices of YouTube shooting sensation 22plinkster. He relies on the accuracy and consistency of Stinger and other CCI loads to pull off his jaw-dropping trick shots. It's why we also offer "Stangers" loads. They have the same great performance as the original, but with special edition packaging and naming that celebrates 22plinkster's signature drawl.

youtube.com/user/22plinkster

VARMINT

CARTRIDGE/PRODUCT NAME	PART NO.	CARTRIDGE	BULLET STYLE	WT. (GRS)	MUZZLE
STINGER**	50	22 LONG RIFLE	CPHP	32	1640
STANGERS**	50100CC	22 LONG RIFLE	CPHP	32	1640

** Use only in firearms having standard ANSI sporting barrel/chamber dimensions.

VARMINT

MAXI-MAG[®] SEGMENTED HP 22 WMR

Clean-22[®] technology is now being used to extend the range and power of 22 WMR. Maxi-Mag Segmented HP uses an exclusive polymer bullet coating to greatly reduce copper and lead fouling in the barrel without leaving a residue. The load's 46-grain Segmented Hollow Point splits into three equal-size pieces on impact, tripling the number of wound channels.

- The industry's only segmenting hollow-point bullet in 22 WMR
- Allows expansion at lower velocities than copper-jacketed bullets
- Segmenting bullet reduces the risk of over penetration on small game targets

MAXI-MAG & VNT™ POUR PACKS

Got ammo? Now you do. CCI® Pour Packs hold 125 rounds of Maxi-Mag or VNT. The convenient cartons pour easily for high-volume shooting at the range or in the field. When the fun's over, they're easy to reclose until your next shoot.

U-MAX®

- Flat-shooting
- Accurate
- Explosive expansion
- Available in 17 HMR and 22 Win. Magnum

VNT™

- Now available in 22 WMR, 17 Mach 2 and 17 HMR
- Speer VNT bullet design
- 17 HMR is 100 fps faster than comparable loads
- Devastating terminal effect on varmints
- Nickel-plated brass on 17 Mach 2 and 22 WMR

TNT®

- Destructive expansion on impact
- Minimal mid-range rise
- Nearly identical point of aim to V-Max in 17 HMR

TNT GREEN®

- Lead-free bullet
- Explosive terminal performance
- Match-grade accuracy

* To avoid serious injury do not use in semi-automatic firearms without consulting with your firearms manufacturer; use only in modern firearms in good condition marked for 17 HMR cartridges.

^o To avoid serious injury from a ruptured cartridge, 17 Mach 2 ammunition should only be used in firearms with components specifically designed to safely fire 17 Mach 2 ammunition, including the firearms action components (bolt/firing mechanism). Do not use this ammunition in firearms that have been modified unless ALL the action components have been specifically designed and verified by the firearm manufacturer as intended for 17 Mach 2.

V-Max is a registered trademark of Hornady®.

VARMINT

MINI-MAG[®] SEGMENTED HOLLOW POINT

Mini-Mag Segmented Hollow Point combines all of what made the original a favorite with a bullet engineered to split into three equal-size parts on impact, creating three distinct wound channels that quickly take down varmints.

- Flat shooting and highly accurate to maximize effective range
- Reliable feeding
- Clean-burning powder causes significantly less barrel fouling

Mini-Mag Segmented Hollow Point uses a bullet that splits into three pieces on impact, tripling the lethality.

22 SHORT HOLLOW POINT

- A CCI exclusive
- Great stopping power
- Reliable expansion

MINI-MAG

- Reliable cycling
- Extreme accuracy
- High velocities and flat trajectories

MAXI-MAG[®]

- Clean-burning propellants
- Peak velocities
- Maximum energy transfer on impact

A17[®] VARMINT TIP

Get magnum rimfire performance in a semi-automatic rifle. CCI® engineers literally built this 17 HMR load around the A17 rifle from Savage®. The round is optimized for feeding and function in the semi-automatic rifle, and produces muzzle velocities 100 fps faster than other 17 HMR loads with the same bullet weight.

- Can be fired through bolt-action 17 HMR rifles
- Varmint Tip bullet provides rapid expansion

A17 17 HMR (949CC) shot into bare ballistics gel at 100 yards; 6 inches penetration.

SMALL GAME

QUIET-22™ SEGMENTED HP

- 40-grain Segmented HP bullet
- No hearing protection needed when fired in locked-breech firearms
- Standard 22 Long Rifle case
- Excellent accuracy

SUB-SONIC HP

- Low noise
- Bullet expands without fragmenting
- Great performance on small game

SUPPRESSOR

- Subsonic velocity further minimizes noise through suppressed firearms
- Hollow-point bullet consistently expands at low velocities
- Reliable function in suppressed semi-automatic firearms
- Clean-burning powders

SMALL GAME

CARTRIDGE/PRODUCT NAME	PART NO.	CARTRIDGE	BULLET STYLE	WT. (GRS)	MUZZLE
SUB-SONIC HP	56	22 LONG RIFLE	LHP	40	1050
QUIET-22 SEGMENTED HP *	970	22 LONG RIFLE	CPRN	40	710
SUPPRESSOR	957	22 LONG RIFLE	LHP	45	970

* These cartridges may be used in semi-automatic firearms, however manual cycling of the action may be required.

SMALL GAME

SUPPRESSOR MAX

NEW

Whisper-quiet yet powerful rimfire performance is now within reach. CCI Suppressor Max™ is specifically designed for optimal accuracy, terminal performance and noise reduction when fired through rimfire suppressors. The specialized segmenting hollow-point bullet ensures violent disruption on impact—even at its low-decibel, sub-sonic 970 fps muzzle velocity, with excellent segmentation at 100 yards.

- Designed for maximum effectiveness on target out of a suppressed rifle or pistol
- Loaded to 970 fps, Suppressor Max cycles in all semi-automatics
- 45-grain segmenting hollow-point bullet is safe to shoot through all suppressors
- Customized segmenting hollow point bullet expands reliably and dramatically at low velocity—totally unlike conventional suppressor rounds
- 100-count packaging

SMALL GAME

VELOCITOR[®] HP

Shoot flatter and hit distant small game harder with CCI® Velocitor HP loads. They're 200 fps faster than 22 Long Rifle high-velocity loads of the same bullet weight and provide excellent weight retention, downrange energy and penetration.

GAMEPOINT®

- Dimple-Tip expands like a big game bullet
- Minimal meat and hide damage
- Accurate, powerful

SMALL GAME FMJ

- Punches clean holes
- 17 HMR option is a CCI exclusive
- Very accurate
- No expansion

SMALL GAME

TARGET, PLINKING & COMPETITION

CLEAN-22[®]

The future of rimfire is here. Clean-22 uses an exclusive polymer bullet coating to greatly reduce copper and lead fouling in the barrel—without leaving a residue. Now available in 200-count pour packs and 400-count bottles decked out in Realtree[®] Edge™ camouflage.

- Cuts lead buildup in suppressors 60 to 80 percent
- Optimized bullet geometry for improved accuracy
- Available in Sub-Sonic and High-Velocity

MAXI-MAG[®] TMJ[®]

- Consistent performance for plinking
- Utilizes surefire priming technology
- Jacket seamlessly encases lead core for accuracy

22 LONG

- A CCI exclusive
- Only 22 Long load on the market
- Extreme reliability and accuracy

CLEAN-22 HYPER VELOCITY

Get all the benefits of Clean-22 technology with the flat trajectories and power of an extreme velocity load. Clean-22 Hyper Velocity clocks in at 1550 fps, while its exclusive polymer bullet coating reduces fouling, especially in suppressed rimfires.

CLEAN-22™ SUPPRESSOR

- Ballistically optimized 45-grain lead round nose bullet
- Reliable function in semi-automatic firearms
- 1,000 fps muzzle velocity
- Advanced polymer bullet coating reduces lead fouling inside a suppressor 60 percent

TARGET, PLINKING & COMPETITION

QUIET-22™ SEMI-AUTO

- Flawless cycling through semi-automatic rifles
- Dramatic reduction in perceived noise
- Excellent accuracy
- Low velocity

MINI-MAG®

- Original CCI 22 Long Rifle offering, and still the most popular
- Reliable feeding
- Clean-burning powder minimizes barrel fouling

QUIET-22

- 75 percent less perceived noise than standard velocity 22 Long Rifle loads
- Excellent accuracy
- Low velocity

TARGET, PLINKING & COMPETITION

GREEN TAG[®]

When a competition is on the line, settle for nothing less than the ultimate rimfire accuracy. CCI[®] Green Tag is suitable for both rifles and pistols, and is designed exclusively for competition.

PISTOL MATCH

Get unmatched function in handguns with Pistol Match ammunition. Its precision components and tight tolerances make it an excellent choice for competitive handgun shooting.

- Proven accuracy in handguns
- Improved functionality across different handguns

STANDARD VELOCITY

- Affordable practice round
- Same velocity as Green Tag
- Consistent performance

22 AR TACTICAL

- Optimized for cycling and accuracy in rimfire AR platforms
- 1.5-inch groups at 100 yards in factory testing
- Copper-plated round-nose bullet

22 SHORT

- High velocity
- Copper-plated for clean bores
- Great accuracy, performance

HEVI-BISMUTH CENTERFIRE SHOTSHELL

You don't get to choose when or where you'll encounter dangerous, damaging pests. Be prepared to take them out with CCI® HEVI-Bismuth™ centerfire handgun shotshells. They're built on CCI's proven centerfire handgun shotshell design but are loaded with the Catalyst™ lead-free primer and HEVI-Bismuth pellets alloyed and cast in Sweet Home, Oregon. At 9.6 g/cc, the shot carries nearly the same density and downrange energy of lead, but adheres to all non-toxic ammunition requirements.

- Completely lead-free
- Centerfire handgun shotshells
- 9.6 g/cc HEVI-Bismuth pellets
- Catalyst high-performance lead-free primer
- Effective short-range patterns on pests

HEVI-BISMUTH NEW

PEST CONTROL RIMFIRE

Now you can take on damaging pests with rimfire handguns and rifles and the clean power of bismuth pellets. New CCI® HEVI-Bismuth™ rimfire shotshells are built on the proven rimfire shotshell design but are loaded with No. 11 non-toxic 9.6 g/cc pellets alloyed and cast in Sweet Home, Oregon.

- Lead-free shot
- Effective close-range pest-control option
- Payload of No. 11 HEVI-Bismuth shot is nearly as dense as lead but 100 percent non-toxic
- Reliable CCI priming
- Available in 22 LR and 22 WMR

*DO NOT USE SHOTSHELLS IN FIREARMS WITH PORTED BARRELS OR PORTED RECOIL COMPENSATORS. DO NOT RELOAD THESE CARTRIDGE CASES. These cases are marked NR (Not Reloadable). Rupture of reloaded cases can cause severe injury. Intended for short-range pest control; not recommended for self-defense. Cylinder lock up may occur in lightweight revolvers due to capsule movement resulting from recoil inertia. * These cartridges are loaded with a lighter projectile than conventional 9mm Luger ammunition for use in pistols and revolvers. They may not function reliably in all models of firearms. *** May not function properly in rifles. **** DO NOT USE IN REVOLVERS—cylinder lock-up may occur.*

PEST CONTROL

RIMFIRE SHOTSHELL

- Consistent patterns
- Easier hits on pests
- Only 22 WMR shotshell load on the market

CB

- More effective at longer ranges on pests
- Accurate
- Great plinking loads

NOISE BLANKS

- Great for training
- Clean-burning propellant
- Work in any firearm chambered for 22 Short, Long or Long Rifle

22 WRF JACKETED HOLLOW-POINT

- 19th century favorite with 21st century technology
- Only 22 WRF JHP in the industry
- Copper composition and special base are ideal for old barrels

RIMFIRE PEST CONTROL

DO NOT USE SHOTSHELLS IN FIREARMS WITH PORTED BARRELS OR PORTED RECOIL COMPENSATORS. DO NOT RELOAD THESE CARTRIDGE CASES. Rupture of reloaded cases can cause severe injury. Intended for short-range pest control; not recommended for self-defense. * Not for revolvers. Most 22 WRF revolvers have undersized bores that cannot use a jacketed bullet. Performance data derived from industry test barrels; provided for reference. Velocities from production firearms may vary. Specifications subject to change without notice.

PRECISION PRIMERS

High-performance handloads start with CCI® primers. Our designs are sensitive and proven to offer extremely consistent, reliable performance for every application.

STANDARD RIFLE/ PISTOL PRIMERS

- Clean-burning
- Mil-spec offerings available
- Unmatched reliability

MAGNUM RIFLE/ PISTOL PRIMERS

- Provide extra heat and ignition power
- 20 percent hotter flame to light propellants in the toughest hunting conditions
- No loss in sensitivity

BENCH REST RIFLE PRIMERS

- Built specifically for bench rest shooters
- Engineered to provide precision ignition in tough competition
- Assembled with extra care for superior consistency and accuracy

PERCUSSION CAPS

- Non-corrosive, non-mercuric priming compounds
- Choice of styles
- Assembled with soft, ribbed copper cups

209 IN-LINE MUZZLELOADING PRIMERS

- Optimized for muzzleloading
- Reduce fouling
- Formulated to ignite in humid conditions

SHOTSHELL PRIMERS

- 209 primer designed for standard field and target loads
- Reliable, clean-burning
- Fit all modern shotshell cases with 209 primer pocket
- 209M is a true magnum shotshell primer for heavy waterfowl and turkey loads

FOUR-WING MUSKET CAPS

- Tough four-wing design
- Lighter explosive charge
- Designed especially for reenactment

ERIC GRAUFFEL WORLD IPSC CHAMPION

A lifelong passion for shooting has brought France's Eric Grauffel to victory at the highest levels of competition, with several national titles, eight European titles, multiple USPSA national titles, and eight World Champion titles to his credit. He trains and competes exclusively with CCI ammunition and components, and has since his first major titles in 1998. In addition to his competitive shooting career, Grauffel runs a custom shop and his own range where he trains shooters from all around the world.

CB = "conical ball" reduced power/noise; FP = flat point; CP = copper-plated; L = lead; J = jacketed; HP = hollow-point; RF = Rimfire; RN = round nose; SHP = segmented hollow-point; SP = soft point; TMJ = encapsulated full metal jacket.
 *—not for revolvers. Most 22 WRF revolvers have undersized bores that cannot use a jacketed bullet. Performance data derived from industry test barrels; provided for reference. Velocities from production firearms may vary. Specifications subject to change without notice. #—Bulk pack. \$ Trajectory—bullet path based on 1.5 inches sight height. * Do not use 17 HMR ammunition in semi-automatic firearms without first contacting your gun manufacturer. ** Use only in firearms having standard ANSI sporting barrel/chamber dimensions. *** These cartridges may be used in semi-automatic firearms, however manual cycling of the action may be required. *to avoid serious injury from a ruptured cartridge, 17 Mach 2 ammunition should only be used in firearms with components specifically designed to safely fire 17 Mach 2 ammunition, including the firearms action components (bolt/firing mechanism). Do not use this ammunition in firearms that have been modified unless ALL the action components have been specifically designed and verified by the firearm manufacturer as intended for 17 Mach 2.

BLAZER
AMMUNITION

POUR PACK 22 LR

OPEN A CARTON FULL OF FUN

Carton-style Blazer® Pour Packs make it easy to handle all the ammo needed for a big day at the range. The cartons hold 425 rounds of Blazer 22 Long Rifle ammunition loaded with 38-grain round nose bullets. They're consistent, accurate and built for high-volume shooting. When range day is done, the containers close securely to hold the remaining rounds until your next shoot.

- 38-grain lead round nose bullets
- With a bull's-eye graphic printed on its side, the carton can be emptied, flattened and used as a target
- 1,235 fps muzzle velocity
- Clean-burning propellant and consistent non-corrosive priming

BLAZER 22 LR PLINKING PERFORMER

Our 22 Long Rifle ammo is loaded with a 40-grain bullet that's great for everything from small game hunting to casual plinking. *Now available in buckets!*

BLAZER ALUMINUM

GREAT ECONOMY THROUGH GREAT TECHNOLOGY

Shoot more with Blazer Ammunition. Our aircraft-grade aluminum is heat-treated and provides the same great performance of brass-case ammo at a more economical price.

- Loaded with quality bullets and reliable ignition primers
- Wide selection of bullet weights and styles
- Greatly reduces the cost of practice
